Natural Language Processing

Lecture #1

Outline

- Course Introduction
- Brief Introduction of NLP

Course Introduction

- Course Name: Natural Language Processing
  - Language Modelling
  - POSTagging
  - Parsing
- Course Code: CSH4O3
- Credits : 3

- 14 weeks of each:
  - 3 x 50' class
  - 3 x 50' structured tasks
  - 3 x 50' self study

Lecturer

- Ade Romadhony
- NIP: 06840042
- Email:
  - aderomadhony@telkomuniversity.ac.id
  - ade.romadhony@gmail.com
  - http://aderomadhony.staff.telkomuniversity.ac.id
- Room:
  - E102

Rules

- Attendance -> please be aware and follow institution rules
- Cheating and plagiarism -> E
- No additional assignments or exams to improve final grade
- 15' late tolerance

Prerequisite

- Probabilistic and Statistic
- Artificial Intelligence
- Automata and Language Theory

Course Objectives

- Student is able to build and evaluate a Language Modelling and POSTagging based system

- Student is able to build and evaluate a syntactic parsing based system

- Student is able to build and evaluate a semantic based system (semantic vector and word sense disambiguation)

- Student is able to design, build and evaluate an NLP based system for a real world problem

Syllabus

- NLP Introduction
- Language Modelling
- Part of Speech (POS) Tagging, HMM
- Syntactic Parsing: Context Free Grammar, Syntactic Parsing, PCFG
- Semantic similarity: Semantic Vector, Word Sense Disambiguation
- Text Classification: Naïve Bayes, Logistic Regression

Weekly Assignments

Scoring

- CLO1: 30% (50% Mid Exam + 50% Assignments)
- CLO2: 25% (50% Mid Exam + 50% Assignments)
- CLO3: 15% (50% Final Exam + 50% Assignments)
- CLO4: 30% (50% Final Exam + 50% Assignments)

Grading

A	80 ... 100.0
AB	75 ... 79.99
B	70 ... 74.99
BC	60 ... 69.99
C	50 ... 59.99
D	40 ... 49.99
E	0 ... 39.99

Read Chapter 1, subchapter 1.1 – 1.5 SLP Book

Terminologies

- Phonetics and Phonology – The study of linguistic sounds.
- Morphology – The study of the meaningful components of words.
- Syntax – The study of the structural relationships between words.
- Semantics – The study of meaning.
- Pragmatics – The study of how language is used to accomplish goals.
- Discourse – The study of linguistic units larger than a single utterance

NLP Problem
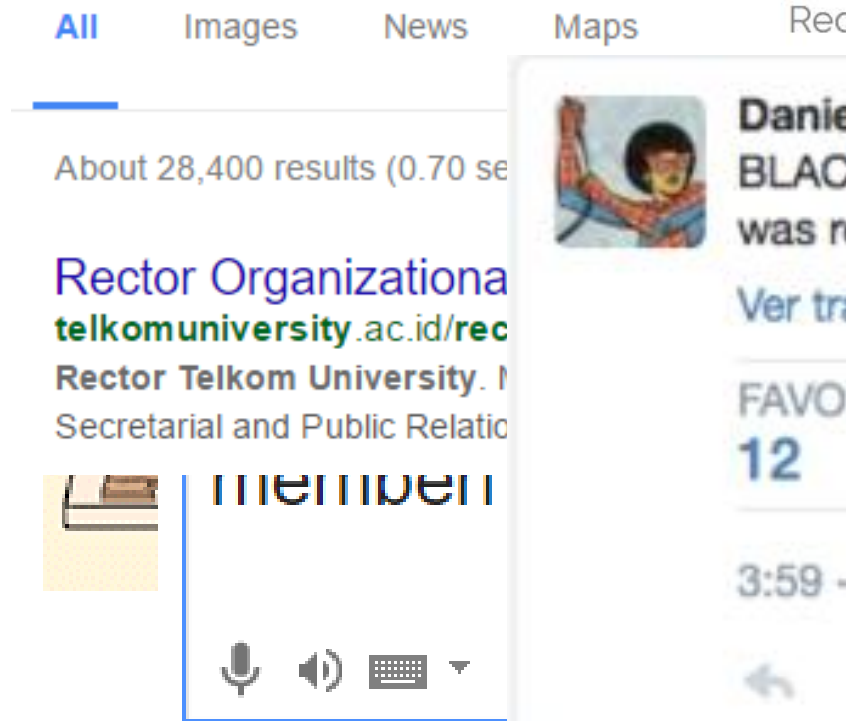

Voice Model:

US English broadband model(16KHz) ▼

Keywords to spot:

sense of pride, watson, technology, changing the world, round, w

☐ Detect multiple speakers (Not supported on current model)

⏺ Record Audio   ⬆ Upload Audio File   ▶ Play Sample 1   ▶ Play Sample 2

❗ No speech detected for 30s.

Text   Word Timings and Alternatives   Keywords (0/7)   JSON

I love you. You love mean. Where had bees and lo Li. We take great BP had. And the keys from me do you. Want you say you Love Me E. to. I love you you Love Me we are best friends like friends who'd pee wee that Greg being. And the keys from me do you want you say you Love Me too.

Why is NLP Hard ?

AMBIGUITY AT ALL LEVEL OF ANALYSYS !!!

Phonetics and Phonology

- I Scream vs Ice cream

Morphology

- Unionized = union + ized vs un+ionized

Syntax

- Squad helps [dog bite victim] vs [Squad helps dog] bite victim

Semantics

- Jack invited Mary to the Halloween ball

Why is NLP Hard ?

Discourse

- Merck & Co. formed a joint venture with Ache Group, of Brazil. **It** will be called Prodome Ltd

Pragmatics

- Concerns how sentences are used in different situations and how use affects the interpretation of the sentence.
  "I just came from New York"
  - ➢Would you like to go to New York today?
  - ➢Would you like to go to Boston today?
  - ➢Why do you seem so out of it?
  - ➢Boy, you look tired.

Language Technologies (from Jurafsky's slide)

Why else is natural language understanding difficult? (from Jurafsky's slide)

non-standard English

Great job @justinbieber! Were SOO PROUD of what youve accomplished! U taught us 2 #neversaynever & you yourself should never give up either♥

segmentation issues

the New York-New Haven Railroad
the New York-New Haven Railroad

idioms

dark horse
get cold feet
lose face
throw in the towel

neologisms

unfriend
Retweet
bromance

world knowledge

Mary and Sue are sisters.
Mary and Sue are mothers.

tricky entity names

Where is *A Bug's Life* playing …
Let It Be was recorded …
… a mutation on the *for* gene …

But that's what makes it fun!

Making progress on this problem…

- The task is difficult! What tools do we need?
  - Knowledge about language
  - Knowledge about the world
  - A way to combine knowledge sources
- How we generally do this:
  - probabilistic models built from language data
    - P("maison" $\rightarrow$ "house")   high
    - P("L'avocat général" $\rightarrow$ "the general avocado")   low
  - Luckily, rough text features can often do half the job.

This Course ?

- General introduction to the filed of Natural Language Processing
- Learn techniques to overcome those ambiguities
